Sargents LANDSCAPING SERVICE

● COMPLETE PLANNING SERVICE

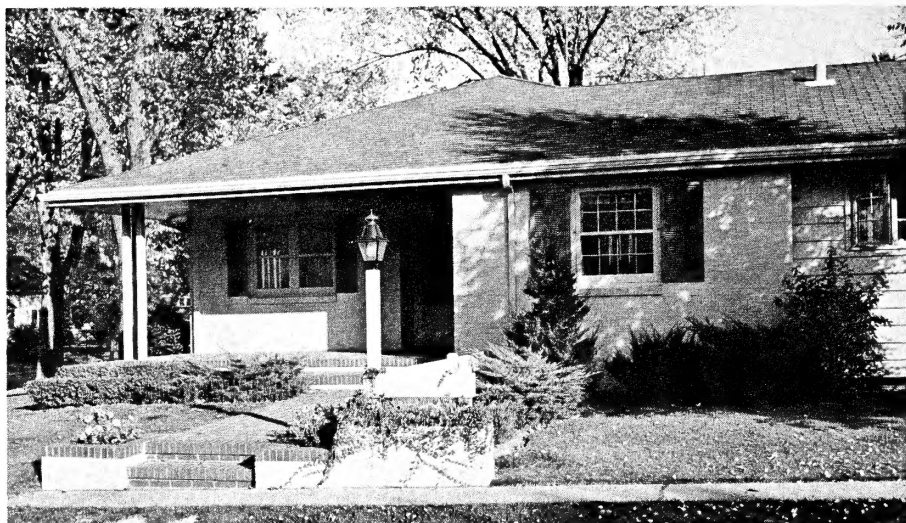

We'll prepare a complete landscape plan for you, to suit your needs and your budget, at nominal cost, explaining in detail what can be done on your property to make it more attractive and useful. The cost is deducted in full from your first purchase of plants for that amount.

● ON THE SPOT PLANTING SUGGESTIONS

Bring a photo or elevation sketch of your home to help us assist you in making planting suggestions — at no cost.

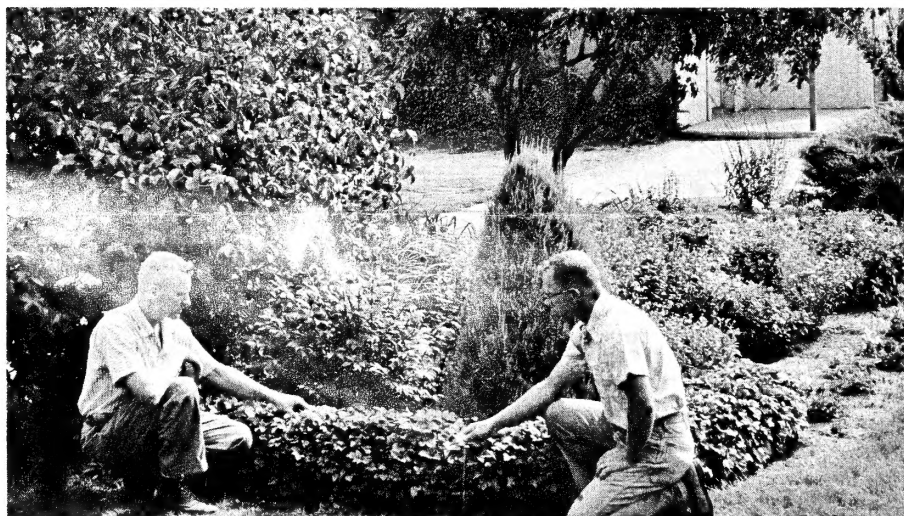

SUMMER PLANTING

This year for the first time we are offering many of our regular landscape plants **POTTED-GROWING** and in **FULL LEAF** for **PLANTING AT ANY TIME DURING THE SUMMER.**

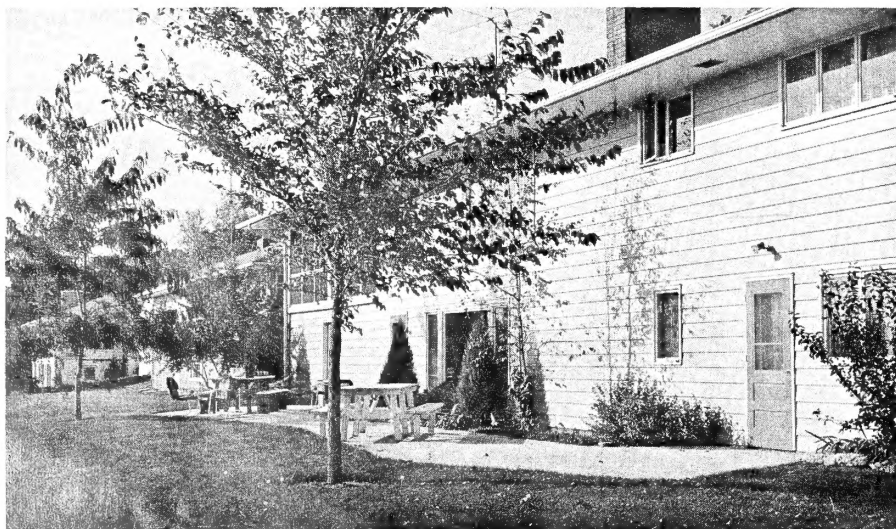

Landscape by Sargents

Patterns of shade help make this an inviting entrance. Junipers and Yews provide the evergreen foliage. A section of two-level Alpine Currant hedge at the corner to the left makes for added interest. Bright Petunias and Geraniums provide good color all summer, and lovely background trees provide the setting for the scene.

Max. and Dick by a border hedge in one of the display plantings at the nursery. You are invited to look over these display plantings at any time.

Landscape by Sargents

The Elm and the Locust have been growing here three years and are already giving useable shade. A measure of privacy is gained with the Russian Olive at the far corner of the house. The smooth paved patio is much used. Whether it's patio blocks laid on sand or it's poured concrete, be sure to have a reasonably smooth surface. Rough native limestone is too rough to be useable as patio or walk surface.

LANDSCAPING WITH EVERGREENS

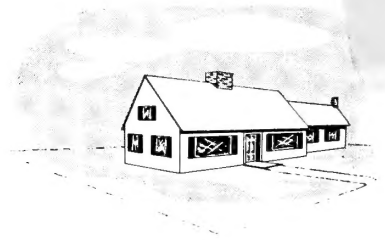

Landscape by Sargents

Welch's Juniper is the slender evergreen, and Siberian Arbor Vitae and Pfizer Juniper account for the other evergreens. Sugar Maple and Thornless Honey Locust enframe the house, with Alpine Currant hedging on top of the dry-laid wall.

WHICH?

A paying investment

Landscape by Sargents

Siberian Arbor Vitae, clipped, give good emphasis and neatness at the doorstep. Pfizer Junipers repeat the horizontal line of the picture window. Shade trees give enframement and background for the house.

For a 12-months, year 'round pay-off, there is no value in gardening like evergreens. A garden planned around evergreens looks well season after season.

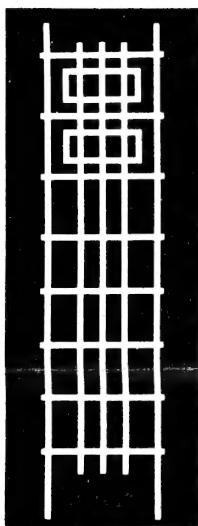

Pyramidal and Siberian Arbor Vitae frame the doorway of this west facing home. Alpine Currant under the window and repeated along the left lot line give a note of unity to the plan and some separation of front yards. The trees tend to set off this property from the neighbors, which is almost always to be desired.
